$\square \square$

$\square \quad \square \quad \square$

A 10x20 grid of squares. The squares are arranged in 10 rows and 20 columns. The squares are filled with varying shades of gray, representing a noisy image of the letter 'A'. The noise is represented by squares that are either black or white, while the letter 'A' is represented by squares of varying gray shades. The letter 'A' is located in the center of the grid, with its top at row 1, column 10, and its base at row 10, column 10. The letter 'A' is composed of a vertical stem on the left, a vertical stem on the right, and a horizontal crossbar in the middle. The crossbar is at row 5, column 10. The vertical stems are at column 10 and column 19. The letter 'A' is surrounded by a noisy background of black and white squares.

A 6x20 grid of squares representing a 2D density plot. The grid is composed of 120 squares arranged in 6 rows and 20 columns. The squares are shaded in various intensities of gray, ranging from very light (low density) to dark gray (high density). The pattern shows a high density of dark gray squares in the top-left and bottom-right corners, with a lower density of lighter gray squares in the center. The distribution is roughly symmetric along the main diagonal.
