A 20x20 grid of small squares. The pattern is roughly rectangular, with some missing squares at the bottom left corner. The squares are arranged in a grid, with some squares filled with black and others empty. The pattern is sparse, with many empty squares.

A 20x20 grid of squares, some of which are filled with black, forming a sparse, abstract pattern. The pattern is roughly rectangular, with a few squares missing from the top and bottom edges. The squares are arranged in a grid, with some squares being black and others white.

A 7x25 grid of squares. The squares are arranged in 7 rows and 25 columns. Some squares are filled with black ink, forming a pattern that resembles a handwritten letter 'A'. The filled squares are located at the following (row, column) coordinates (starting from (0,0) at the top-left):

The figure displays a 2D density plot using a 12x25 grid of squares. The squares are shaded in various intensities of gray, where darker shades represent higher density. The highest density is concentrated in the top-left corner of the grid, with the density gradually decreasing as one moves towards the bottom-right corner. The overall shape of the distribution is roughly rectangular but tapers off towards the bottom-right.
