A 10x20 grid of squares. The squares are arranged in 10 rows and 20 columns. The squares are filled with varying shades of gray, representing a noisy image of the letter 'A'. The noise is represented by squares that are either black or white, deviating from the expected gray tones of the letter 'A'.

The diagram consists of five horizontal rows of small squares. The top four rows each contain 20 squares, while the bottom row contains 3 squares.

A 10x20 grid of squares. The squares are arranged in rows and columns, with some squares missing, creating a sparse pattern. The missing squares are located at the following (row, column) coordinates (starting from 0,0 at the top-left):

A 10x20 grid of squares. The squares are arranged in 10 rows and 20 columns. The squares are filled with varying shades of gray, representing a noisy image of the letter 'A'. The noise is represented by squares that are either black or white, while the letter 'A' is represented by squares of varying gray intensity. The letter 'A' is centered in the grid, with its top at row 1, column 10, and its base at row 10, column 10. The letter 'A' is formed by a vertical stroke on the left, a vertical stroke on the right, and a horizontal crossbar in the middle. The noise is distributed throughout the grid, with some squares being black and some being white, creating a noisy background for the letter 'A'.
