

The image shows three rows of square blocks. The first row contains 100 blocks, the second row contains 1000 blocks, and the third row contains 10000 blocks. This visual representation demonstrates the concept of powers of ten and how they relate to the number of digits in a number.

The diagram consists of two horizontal rows of small squares. The top row contains 16 squares, which are organized into 8 distinct groups, each containing 2 squares. The bottom row contains 10 squares, organized into 5 distinct groups, each containing 2 squares.
